Slack brings team communication and collaboration into one place so you can get more work done, whether you belong to a large enterprise or a small business. It replaces email with something faster, better organized and more secure.

WorkInSync aims to leverage this by offering a powerful, robust and secure application on Slack.

Installation

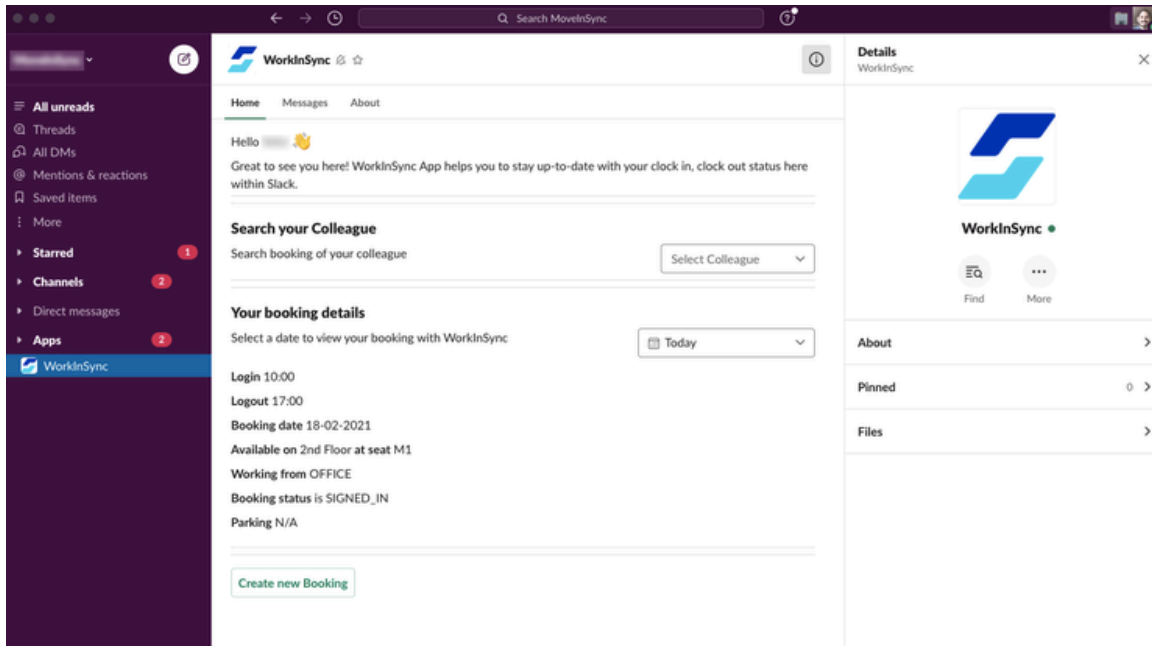

1. Click the plus icon next to “Apps” in your Slack workspace that is registered with your organization.
2. Search for the “WorkInSync app, select the application card and install.
3. Once installed, click on the ‘Home’ tab in the the ‘WorkInSync app & click ‘Connect your account’
4. On the page that opens, review the permissions that the app is asking for and click ‘Allow’.

5. Your WorkInSync app is now configured and ready to use.
6. In the event that your organization has restricted users installed third-party apps, please reach out to your workspace admin to allow installation of the WorkInSync app.

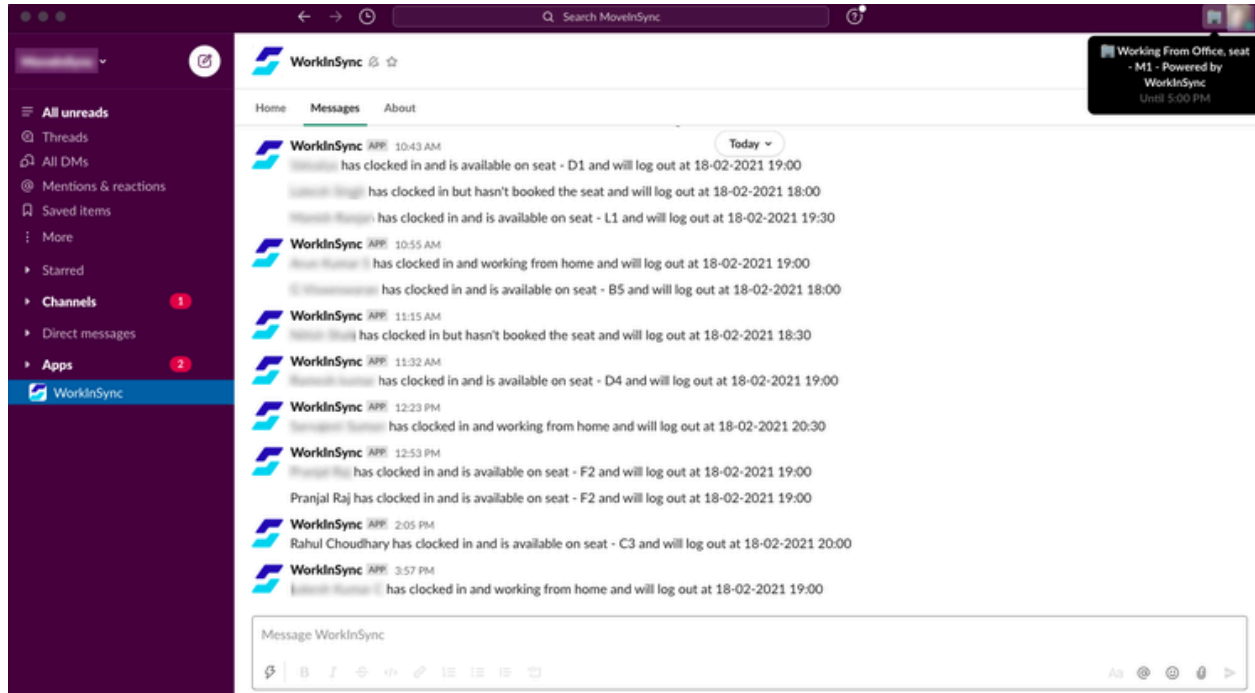

Features

- From the 'Home tab' of WorkInSync Slack app, users can -
 - Book a seat in office when they want to work from office, or create a work from home booking.
 - Edit or Cancel an existing booking.
 - Find where a colleague is working from today.

Search for your colleagues, view booking details and create a new booking

- Alerts and Notifications
 - WorkInSync Slack app sends you messages/notifications when a teammate checks in to the office, or from home.
 - It also lets you know when teammates clock out.

Get notified where your colleagues are working from

- Status updates
 - WorkInSync updates your status as 'Working from Home' or 'Working from office' as you check-in for your colleagues to quickly see.

Note -

If the user does not have an active WorkInSync registered account, they can perform onboarding from the Slack app which redirects them to the signup page.

Permissions

Security and a good user experience is always paramount at WorkInSync. Keeping that in mind, user details are only viewed and not stored.

WorkInSync permissions required for an optimal experience -

- Data retrieval permissions -
 - Retrieval of user's name, email, Slack user ID and icon.
 - Retrieval of User Access token, Bot token and Bot channel ID for a user from the Slack app.
 - WorkInSync stores all PII (Personally Identifiable Information) in an encrypted format and is retained as long as it is necessary to achieve the purpose for which it was collected or received.

- Data storage policy -
 - WorkInSync as an organization does not collect any data via the Slack app. No personal information is ever transferred to affiliated entities, or to other third parties.
 - WorkInSync does not store any user data in persistent storage.
- The WorkInSync app makes use of Slack's enterprise-grade data protection, privacy and security. Slack offers multiple ways to ensure that your information, conversations and files stay safe.
- Granular controls allow admins to customize security for each user.
- At every layer, Slack adheres to multiple compliance certifications, including SOC 2, SOC 3, ISO/IEC 27001 and more.
- Slack is GDPR-compliant and can be configured for HIPAA and FINRA compliance.
- Slack offers security features, such as -
 - Enterprise Key Management - Allows admins ultimate control over data encryption.
 - Slack Connect - It is a secure and productive way for organizations to communicate together. It lets you move all the conversations with your external partners, clients, vendors and others into Slack, replacing email and fostering collaboration.
